Matthew Waler

Pragmatic Frontend Developer

ABOUT

I am a highly eager, competent, and pragmatic Frontend Developer that will never stop learning new technologies. Right now, I'm highly invested in Vue.js, PostCSS, and JAMstack methodologies.

EXPERIENCE

Frontend Developer

thunder::tech   2018 - Now

✓ Convert high-fidelity design files into fully functional, widely browser-compatible static websites

✓ Develop frontend tooling and processes to help develop client projects more quickly and efficiently

✓ Utilize new frameworks and tools like Vue.js and PostCSS to accomplish different client goals

✓ Write responsive and future-friendly code in HTML, SCSS, and JS

✓ Manage and maintain repositories using Git

✓ Develop, deploy, and debug past and ongoing client projects

Web Content Specialist

WBC Group, LLC   2016 - 2018

✓ Write CSS resets and overrides using SCSS to allow for robust custom landing pages on top of existing platforms

✓ Develop custom landing pages to improve organic search traffic to websites

✓ Design digital assets for use on web using Photoshop and Sketch

✓ Deploy web changes on a monthly basis for promotions and offerings using SAP Hybris

✓ Train and manage small team of 5-10 employees to standardize CMS processes, organize large-scale projects, and report progress to superiors
